Scout Releases New 231 XSB

Summerville, SC – Scout Boats, Inc. has released a new model in the bay boat line-up, the **231 XSB**. This is the third XS model in the bay boat/inshore line-up and compliments the already popular 251 XSS and replaces the current 231 XS model.

Scout models are defined by their 100% hand-laid construction, head-turning designs, superior fit and finish, best strength-to-weight ratio in its class, fuel efficient hull designs, and completely finished bilge, lids, doors and hatches.

The 231 XSB is set apart with notable features such as spacious seating in the bow with removable cushions and storage underneath, and up to five removable backrests throughout the boat for added comfort. Simultaneously offering port and starboard rod storage, coupling the luxury of a Scout with all the characteristics of a serious bay boat. Scout's bay boat collection is known for its aggressive lines, high performance, and all around fishability.

Scout has built a reputation for being first-to-market with innovations throughout its 30+ year history, and the 231 XSB is no different. With an upgradable option of a new patent-pending thru-hull anchor pole, named the Scout Post, this model continues to push Scout to the top of its class.

Standard features throughout include a powder coated hybrid leaning post, port and starboard aerated baitwells and release wells, (4) stainless steel flush mount cup/rod holders, (6) stainless steel flush mount rod holders, console lounge seat with cushion set and a Fusion Bluetooth stereo with (4) 6" speakers...just to name a few.

Notable options on the 231 XSB include two options aft baitwells, three leaning post options, an aluminum T-top with aft spreader light, rocket launcher and T-bag, upgradable Garmin display screens, a porta potti and power assist hydraulic steering.

Scout builds luxury sportfishing center console, luxury crossover, dual console and inshore/bay boat models ranging from 17' to 53'. Since its founding nearly three decades ago, the company's goal has been to manufacture the best-built boats in its distinctive sportfishing niches. Each Scout hull is a true original, as the in-house research and design team works closely with engineering to take concepts from blueprint to production more efficiently, growing the company's world-class reputation for quality, strength, durability and value.
